

Village of Kent City Fall Leaf Pickup

Resident's leaves will be **vacuumed up** this year
From October 22nd through November 30th or the first
major snowfall.

If you have leaves before we start Leaf-Vac pickup, please put leaves in a container that can be hand dumped into our truck.

As a reminder, when placing leaves by the roadway edge for pick-up, please keep the following points in mind:

- **Do not** mix grass clippings, animal waste, rubbish, stones, or brush (i.e. sticks) in with leaves. These items plug the screen inside the machine. Leaf piles found with these materials will not be picked up by the Village.
- Leaves should be placed **as close** to the curb or roadway as possible **without leaves in the actual roadway** and in a wind row, not piles. Leaves in the streets will cause storm drains to back-up creating icy and wet intersections as well as slow drainage in the spring.
- The Village leaf vacuum needs curbside access, so park vehicles away from leaf piles.
- **Do not** place leaves in bags

If these rules are not followed, your leaves will not be picked up.

If you have any questions, please contact the DPW Manager at 616-293-0693.
